

NATURAL LIGHT EXHAUST VENT KIT(SVFAN)

Quiet and Powerful Fan for Bathrooms or Laundry Rooms

The bathroom is unquestionably one of the most common rooms needing added light. And large amounts of warm, moisture-laden air can be a problem. Natural Light comes to the rescue with an integrated skylight exhaust system available for our 10" tubular skylight. Our Vent Kit is capable of exhausting 125 cfm, enough to vent a bathroom and shower stall.

Natural Light's ingenious design disguises the intake vent in a sleek trim ring that incorporates the skylight diffuser. No more ugly vent grates! The vent is connected to a motor that is remotely located in your attic space, making it extremely quiet. Flexible exhaust tubing allows for many venting options including a dual exhaust in your shower stall. The vent kit can also accommodate our light kit for evening lighting.

ATTRACTIVE LIGHT FIXTURE WITH HIDDEN INTAKE

Eliminates the
need for traditional
vent grates.
